ANNOUNCEMENT: TRIANGLE GEOMETRY-TOPOLOGY SEMINAR

DATE: Friday, November 7, 2003

LOCATION: Hempfield High School, Room 213 (directions attached) followed by dinner at Gatsby's on Main in Landisville

4:30 TALK: John Rosson, Franklin & Marshall College and Millersville University

"Possibly Post Poincare effects on some Famous Conjectures about 2-Complexes"

ABSTRACT: We describe research concerning some famous conjectures about 2-complexes and discuss how a Perelman Theorem proving the Poincare Conjecture might apply to these results. In particular, we will consider some algebraic invariants relating to the Andrews-Curtis Conjecture.

EVERYONE WELCOME.

PLEASE FORWARD THIS ANNOUNCEMENT TO ANYONE INTERESTED.

The Triangle Geometry-Topology Seminar is sponsored jointly by Elizabethtown College, Franklin & Marshall College and Millersville University.
