

Giancoli PPwA 7, Ch 16 Q 20

Given two point charges Q and $2Q$, a distance l apart, is there a point along the straight line that passes through them where $E = 0$?

- (a) No.
- (b) Yes, directly between the two point charges.
- (c) Yes, closer to Q .
- (d) Yes, closer to $2Q$.

Giancoli PPwA 7, Ch 16 Q 20

Given two point charges Q and $-2Q$, a distance l apart, is there a point along the straight line that passes through them where $E = 0$?

- (a) No.
- (b) Yes, directly between the two point charges.
- (c) Yes, closer to Q .
- (d) Yes, closer to $-2Q$.
